YouTube Google+ Joined Mailing List

Campus Life:

[What is the overall vibe of the campus (clubs, unique campus traditions, etc.)? What do students do after class or on weekends? What is the role of Greek life on campus?]

For those of you into athletics, what are the sports stats of the school? How new are the athletic facilities? Which sports are offered and which division is the school?

For those of you interested in the Arts, look at the Performing Arts calendar or see what is showing in the galleries.

Academics:

[Can you find majors, interdisciplinary majors or programs, interesting research activities, or any other special academic programs such as study abroad that interest you?]

For those of you that are “laser beams” and know what you want to study, read the biographies of professors in your program/major. What are they known for? What are their research interests?

Pros and Cons:

[What stands out as the most significant Pros and Cons: location, costs, weather, size, reputation, etc.?]

- I'll definitely apply!
- Not sure, still thinking about it.
- Probably not going to apply.
